

Custom Peptide Synthesis

Discover our unique synthesis solutions & capabilities

All Peptide Formats

- Peptide pools
- Peptide libraries
- Individual peptides
- Peptide (micro)arrays

Flexible Specifications

- μg to g
- Crude to >95%
- RUO, GLP compliant, preGMP/clinical
- 2 to 50 aa in routine
- Vial, tube rack, glass slide, multiwell plate & membrane

1 million
peptides / year

Countless Modifications

- Phosphorylation
- Unusual & unnatural AA
- Heavy labeled peptides
- Fluorescent labels
- Biotinylation
- Cyclization
- Bioconjugation
- Many more

Why Choose JPT?

- Global support teams
- 20+ years of peptide synthesis experience
- High environmental, health, and ethical standards
- Advanced technology, state-of-the-art equipment & skilled team

Catalog Peptides

For Immunology, Proteomics,
Diabetes, Alzheimer's and more

Antigen Peptides & Peptide Pools

- More than 500 PepMix™ peptide pools and thousands of single antigen peptides
- A assay controls: e.g. CEFX, pp65, Ova
- Viral antigens: e.g. EBV, HHV, SARS2, HCoV, CMV, HPV, VZV
- Bacterial antigens: e.g. M. tuberculosis
- Gene vectors: e.g. HAdV, ChAdV, AAV
- Cancer antigens: e.g. MUC1, PRAME/OIP4, NY-ESO-1, MART-1, Wt1

Individual Peptides

- Amyloid Beta Peptides
- Cell Penetrating Peptides
- Cosmetics (DRPA) Peptides
- Diabetes Peptides
- Hydrogel Forming Peptides
- Peptide Affinity Tags
- Radioligands & Radiosensitizers
- Transduction Enhancer

Kits & Arrays

- Reference kits, standards & controls for quantitative proteomics
- Enzyme substrate sets
- Peptide microarrays on glass slides
